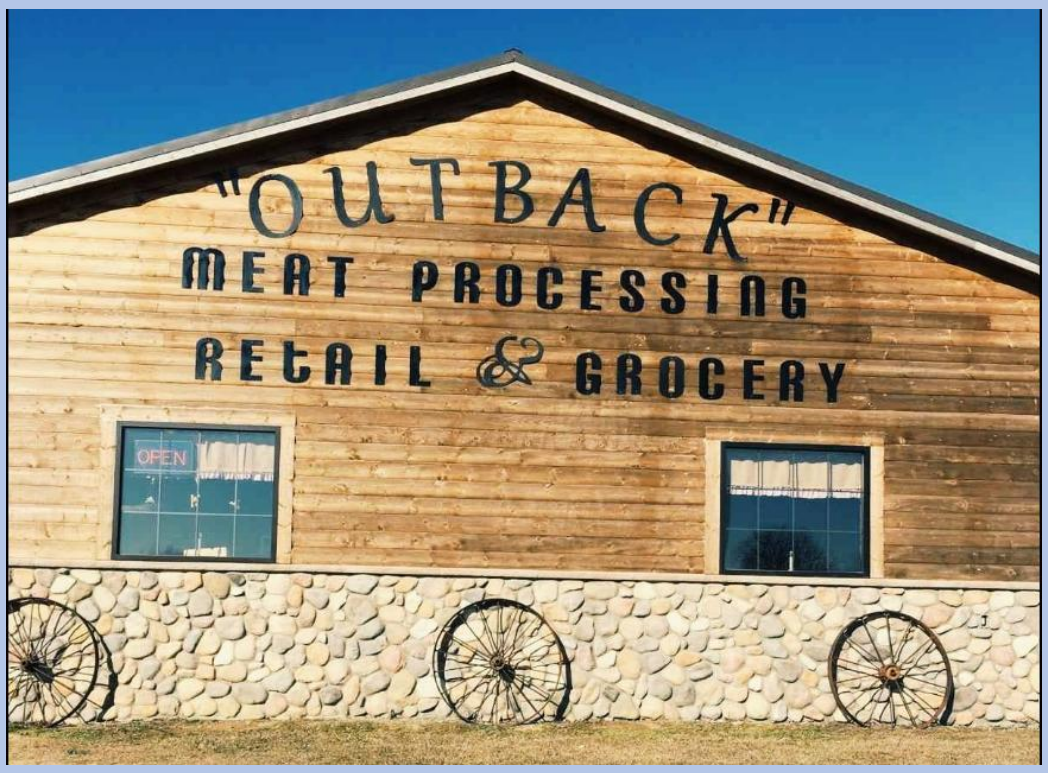
Outback Custom Meat

June 10, 2025

Hello from us here at Outback Meat just want to remind you all about a program we are working with to help with hunger in the area, Michigan Sportsmen Against Hunger.

We take deer that are tagged , field dressed , and we process the deer and it goes to the local food pantries. No charge for processing to the hunter. This starts with the early summer tags all the way thru the late doe season. This program then will reimburse the processor for some of the expenses.

This year we are going to take the reimbursement money and send it halfway around the world to continue to help feed and dress another community in Romania. So all this to say…that by donating a deer to our facility it will have an impact from here to halfway around the world feed our community and the money will continue on to feed and dress another community!

So all you hunters , farmers , ect who have extra and are taking deer off for the summer tags… if you don't have homes for them, we would love to help you help others in our community and beyond just tag , and drag them right on over we will handle from there Thank you for always supporting our mission for missions…. It means so much to us .. May God bless you all as we all work together serving Him !


Jerold, Jo ,Polly and Stella
